Ezingoleni Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Officer's Responsibilities and Approval

The Accounting Officer is required by the MFMA, to maintain adequate accounting records and is responsible for the content and integrity of the financial statements and related financial information included in this report. It is his responsibility to ensure that the financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended, in conformity with Standards of Generally Recognised Accounting Practice (GRAP). The external auditors are engaged to express an independent opinion on the annual financial statements.

The financial statements have been prepared in accordance with GRAP, including and interpretations, guidelines and directives issued by the Accounting Practices Board (APB). These financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgments and estimates.

The Accounting Officer acknowledges that he is ultimately responsible for the system of internal financial control established by the municipality and places considerable importance on maintaining a strong control environment. To enable the Accounting Officer to meet these responsibilities, the Council sets standards for internal control aimed at reducing the risk of error or loss in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The Accounting Officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or loss.

The Accounting Officer has reviewed the municipality's cash flow forecast for the year to 30 June 2016 and, in the light of this review and the current financial position, he is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

I am responsible for the preparation of these annual financial statements in terms of Section 126(1) of the Municipal Finance Management Act (Act No 56 of 2003), and which I have signed on behalf of the municipality.

I certify that the salaries, allowances and benefits of Councillors as disclosed in note 15 of these annual financial statements are within the upper limits of the framework envisaged in section 219 of the Constitution, read with the Remuneration of Public Office Bearers Act, 1998 (Act No. 20 of 1998) and the Minister of Provincial and Local Government's determination in accordance with this Act.

The financial statements set out on pages 4 to 47, which have been prepared on the going concern basis, were approved and signed on 31 August 2015:

Municipal Manager

Ezinqoleni Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1. Presentation of Annual Financial Statements

The financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act, (Act No 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with the historical cost convention as the basis of measurement, unless specified otherwise. The figures in the statements have been rounded to the nearest Rand.

A summary of the significant accounting policies, which have been consistently applied, to all the years presented are set out below.

The following standards and interpretations issued, but not yet effective and have not been early adopted by the municipality:

- GRAP 18 Segment Reporting
- GRAP 20 Related Party Disclosures
- GRAP 105 Transfer of functions between entities under common control
- GRAP 106 Transfer of functions between entities not under common control
- GRAP 107 Mergers

None of these standards and interpretations are anticipated to have a material impact on the entity's financial statements.

1.1 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements. Significant judgements include:

Trade receivables

The economic entity assesses its trade receivables for impairment at the end of each reporting period. In determining whether an impairment loss should be recorded in surplus or deficit, the surplus makes judgements as to whether there is observable data indicating a measurable decrease in the estimated future cash flows from a financial asset.

The impairment for trade receivables is calculated on a portfolio basis, based on historical loss ratios, adjusted for national and industry-specific economic conditions and other indicators present at the reporting date that correlate with defaults on the portfolio. These annual loss ratios are applied to loan balances in the portfolio and scaled to the estimated loss emergence period.

Fair value estimation

The fair value of financial instruments traded in active markets is based on quoted market prices at the end of the reporting period. The quoted market price used for financial assets held by the economic entity is the current bid price.

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. The economic entity uses a variety of methods and makes assumptions that are based on market conditions existing at the end of each reporting period. Quoted market prices or dealer quotes for similar instruments are used for long-term debt. Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments at end of the reporting period. The carrying value less impairment provision of trade receivables and payables are assumed to approximate their fair values.

The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the economic entity for similar financial instruments.

Impairment testing

The economic entity reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. Assets are grouped at the lowest level for which identifiable cash flows are largely independent of cash flows of other assets and liabilities. If there are indications that impairment may have occurred for each group of assets.

Provisions

Ezingoleni Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.1 Significant judgements and sources of estimation uncertainty (continued)

Provisions were raised and management determined an estimate based on the information available.

Useful lives of property, plant and equipment

The economic entity's management determines the estimated useful lives and related depreciation charges for the property, plant and equipment. This estimate is based on industry norm. Management will increase the depreciation charge where useful lives are less than previously estimated useful lives.

Effective interest rate

The economic entity used the prime interest rate to discount future cash flows.

1.2 Going concern assumption

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

1.3 Offsetting

Assets, liabilities, revenues and expenses have not been offset except when offsetting is required or permitted by a Standard of GRAP.

1.4 Leasehold property, plant and equipment

Leasehold property, plant and equipment are tangible items that:

- are held for use in the production or supply of goods or services, for rental to others or for administrative purposes; and
- are expected to be used during more than one period.

Costs include costs incurred initially to acquire or construct an item of leasehold property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of leasehold property, plant and equipment, the carrying amount of the replaced part is derecognised.

Leasehold property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Depreciation is provided using the straight-line method to write down the cost, less estimated residual value over the useful life of the leasehold property, plant and equipment, which is as follows:

Item	Average useful life
Leasehold property	30 years
Infrastructure - Roads	10 years
Machinery and equipment	5 years
Motor vehicles	5 years
Furniture and office equipment	5 years
Computer equipment	5 years

The residual value, depreciation method and the useful life of each asset are reviewed at each annual reporting period if there are indicators present that there is a change from the previous estimate.

Each part of an item of leasehold property, plant and equipment with a cost that is significant in relation to the total cost of the item and have significantly different patterns of consumption of economical benefits is depreciated separately over its useful life.

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised in profit or loss in the period.

1.5 Intangible assets

Intangible assets are initially recognised at cost.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

Ezinqoleni Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.5 Intangible assets (continued)

If the municipality is unable to make a reliable estimate of the useful life of an intangible assets, the life will be presumed to be 10 years.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting period date if there are indicators present that there is a change from the previous estimate.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

Item	Useful life
Computer software	3 years

Ezingoleni Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.6 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity.

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction (directly or through the use of an allowance account) for impairment or uncollectibility.

A concessionary loan is a loan granted to or received by an entity on terms that are not market related.

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

Derecognition is the removal of a previously recognised financial asset or financial liability from an entity's statement of financial position.

A derivative is a financial instrument or other contract with all three of the following characteristics:

- Its value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract (sometimes called the 'underlying').
- It requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors.
- It is settled at a future date.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability (or group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, an entity shall estimate cash flows considering all contractual terms of the financial instrument (for example, prepayment, call and similar options) but shall not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate (see the Standard of GRAP on Revenue from Exchange Transactions), transaction costs, and all other premiums or discounts. There is a presumption that the cash flows and the expected life of a group of similar financial instruments can be estimated reliably. However, in those rare cases when it is not possible to reliably estimate the cash flows or the expected life of a financial instrument (or group of financial instruments), the entity shall use the contractual cash flows over the full contractual term of the financial instrument (or group of financial instruments).

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable willing parties in an arm's length transaction.

A financial asset is:

- cash
- a residual interest of another entity, or
- a contractual right to:
 - receive cash or another financial asset from another entity; or
 - exchange financial assets or financial liabilities with another entity under conditions which are potentially favourable to the entity

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

A financial liability is any liability that is a contractual obligation to:

- deliver cash or another financial asset to another entity; or
- exchange financial assets or financial liabilities under conditions that are potentially unfavourable to the entity.

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Ezinqoleni Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

Liquidity risk is the risk encountered by an entity in the event of difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

Loan commitment is a firm commitment to provide credit under pre-specified terms and conditions.

Loans payable are financial liabilities, other than short-term payables on normal credit terms.

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk.

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

A financial asset is past due when a counterparty has failed to make a payment when contractually due.

A residual interest is any contract that manifests an interest in the assets of an entity after deducting all of its liabilities. A residual interest includes contributions from owners, which may be shown as:

- equity instruments or similar forms of unissued capital;
- a formal designation of a transfer of resources (or a class of such transfers) by the parties to the transaction as forming part of an entity's net assets, either before the contribution occurs or at the time of the contribution; or
- a formal agreement, in relation to the contribution, establishing or increasing an existing financial interest in the net assets of an entity.

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument.

Financial instruments at amortised cost are non-derivative financial assets or non-derivative financial liabilities that have fixed or determinable payments, excluding those instruments that:

- the entity designates at fair value at initial recognition; or
- are held for trading

Financial instruments at cost are investments in residual interests that do not have a quoted market price in an active market, and whose fair value cannot be reliably measured.

Financial instruments at fair value comprise financial assets or financial liabilities that are:

- derivatives
- combined instruments that are designated at fair value
- instruments held for trading. A financial instrument is held for trading if:
 - it is acquired or incurred principally for the purpose of selling or repurchasing it in the near-term; or
 - on initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short term profit-taking;
 - non-derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition; and

Classification

The entity has the following types of financial assets (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class

Trade receivables from exchange transactions
Trade receivables from non-exchange transactions
Bank ,cash and cash equivalents
Long-term receivables
Current portion of long-term receivables

Category

Financial asset measured at fair value
Financial asset measured at fair value
Financial asset measured at amortised cost
Financial asset measured at fair value
Financial asset measured at fair value

The entity has the following types of financial liabilities (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Accrued leave pay	Financial liability measured at amortised cost
Accrual for staff bonus	Financial liability measured at amortised cost
Government grants and subsidies	Financial liability measured at amortised cost

Financial liability measured at fair value

Initial recognition

The entity recognises a financial asset or a financial liability in its statement of financial position when the entity becomes a party to the contractual provisions of the instrument.

The entity recognises financial assets using trade date accounting.

Initial measurement of financial assets and financial liabilities

The entity measures a financial asset and financial liability initially at its fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

The entity measures a financial asset and financial liability initially at its fair value [if subsequently measured at fair value].

The entity first assesses whether the substance of a concessionary loan is in fact a loan. On initial recognition, the entity analyses a concessionary loan into its component parts and accounts for each component separately. The entity accounts for that part of a concessionary loan that is:

- a social benefit in accordance with the Framework for the Preparation and Presentation of Financial Statements, where it is the issuer of the loan; or
- non-exchange revenue, in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers), where it is the recipient of the loan.

Subsequent measurement of financial assets and financial liabilities

The entity measures all financial assets and financial liabilities after initial recognition using the following categories:

- Financial instruments at fair value.
- Financial instruments at amortised cost
- Financial instruments at cost.*

All financial assets measured at amortised cost, or cost, are subject to an impairment review.

Fair value measurement considerations

The best evidence of fair value is quoted prices in an active market. If the market for a financial instrument is not active, the entity establishes fair value by using a valuation technique. The objective of using a valuation technique is to establish what the transaction price would have been on the measurement date in an arm's length exchange motivated by normal operating considerations. Valuation techniques include using recent arm's length market transactions between knowledgeable, willing parties, if available, reference to the current fair value of another instrument that is substantially the same, discounted cash flow analysis and option pricing models. If there is a valuation technique commonly used by market participants to price the instrument and that technique has been demonstrated to provide reliable estimates of prices obtained in actual market transactions, the entity uses that technique. The chosen valuation technique makes maximum use of market inputs and relies as little as possible on entity-specific inputs. It incorporates all factors that market participants would consider in setting a price and is consistent with accepted economic methodologies for pricing financial instruments. Periodically, an municipality calibrates the valuation technique and tests it for validity using prices from any observable current market transactions in the same instrument (i.e. without modification or repackaging) or based on any available observable market data.

The fair value of a financial liability with a demand feature (e.g. a demand deposit) is not less than the amount payable on demand, discounted from the first date that the amount could be required to be paid.

Reclassification

The entity does not reclassify a financial instrument while it is issued or held unless it is:

- combined instrument that is required to be measured at fair value; or
- an investment in a residual interest that meets the requirements for reclassification.

Ezingoleni Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

Where the entity cannot reliably measure the fair value of an embedded derivative that has been separated from a host contract that is a financial instrument at a subsequent reporting date, it measures the combined instrument at fair value. This requires a reclassification of the instrument from amortised cost or cost to fair value.

If fair value can no longer be measured reliably for an investment in a residual interest measured at fair value, the entity reclassifies the investment from fair value to cost. The carrying amount at the date that fair value is no longer available becomes the cost.

If a reliable measure becomes available for an investment in a residual interest for which a measure was previously not available, and the instrument would have been required to be measured at fair value, the entity reclassifies the instrument from cost to fair value.

Gains and losses

A gain or loss arising from a change in the fair value of a financial asset or financial liability measured at fair value is recognised in surplus or deficit.

For financial assets and financial liabilities measured at amortised cost or cost, a gain or loss is recognised in surplus or deficit when the financial asset or financial liability is derecognised or impaired, or through the amortisation process.

Impairment and uncollectibility of financial assets

The entity assess at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired.

Financial assets measured at amortised cost:

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced directly OR through the use of an allowance account. The amount of the loss is recognised in surplus or deficit.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed directly OR by adjusting an allowance account. The reversal does not result in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in surplus or deficit.

Financial assets measured at cost:

If there is objective evidence that an impairment loss has been incurred on an investment in a residual interest that is not measured at fair value because its fair value cannot be measured reliably, the amount of the impairment loss is measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment losses are not reversed.

Derecognition

Financial assets

The entity derecognises financial assets using trade date accounting.

The entity derecognises a financial asset only when:

- the contractual rights to the cash flows from the financial asset expire, are settled or waived
- the entity transfers to another party substantially all of the risks and rewards of ownership of the financial asset;
- the entity, despite having retained some significant risks and rewards of ownership of the financial asset, has transferred control of the asset to another party and the other party has the practical ability to sell the asset in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the entity :
 - derecognise the asset; and
 - recognise separately any rights and obligations created or retained in the transfer

Ezingoleni Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

The carrying amounts of the transferred asset are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. Newly created rights and obligations are measured at their fair values at that date. Any difference between the consideration received and the amounts recognised and derecognised is recognised in surplus or deficit in the period of the transfer.

If the entity transfers a financial asset in a transfer that qualifies for derecognition in its entirety and retains the right to service the financial asset for a fee, it recognise either a servicing asset or a servicing liability for that servicing contract. If the fee to be received is not expected to compensate the entity adequately for performing the servicing, a servicing liability for the servicing obligation is recognised at its fair value. If the fee to be received is expected to be more than adequate compensation for the servicing, a servicing asset is recognised for the servicing right at an amount determined on the basis of an allocation of the carrying amount of the larger financial asset.

If, as a result of a transfer, a financial asset is derecognised in its entirety but the transfer results in the entity obtaining a new financial asset or assuming a new financial liability, or a servicing liability, the entity recognise the new financial asset, financial liability or servicing liability at fair value.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the sum of the consideration received is recognised in surplus or deficit.

If the transferred asset is part of a larger financial asset and the part transferred qualifies for derecognition in its entirety, the previous carrying amount of the larger financial asset is allocated between the part that continues to be recognised and the part that is derecognised, based on the relative fair values of those parts, on the date of the transfer. For this purpose, a retained servicing asset is treated as a part that continues to be recognised. The difference between the carrying amount allocated to the part derecognised and the sum of the consideration received for the part derecognised is recognised in surplus or deficit.

If a transfer does not result in derecognition because the entity has retained substantially all the risks and rewards of ownership of the transferred asset, the entity continue to recognise the transferred asset in its entirety and recognise a financial liability for the consideration received. In subsequent periods, the entity recognises any revenue on the transferred asset and any expense incurred on the financial liability. Neither the asset, and the associated liability nor the revenue, and the associated expenses are offset.

Financial liabilities

The entity removes a financial liability (or a part of a financial liability) from its statement of financial position when it is extinguished — i.e. when the obligation specified in the contract is discharged, cancelled, expires or waived.

An exchange between an existing borrower and lender of debt instruments with substantially different terms is accounted for as having extinguished the original financial liability and a new financial liability is recognised. Similarly, a substantial modification of the terms of an existing financial liability or a part of it is accounted for as having extinguished the original financial liability and having recognised a new financial liability.

The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in surplus or deficit. Any liabilities that are waived, forgiven or assumed by another entity by way of a non-exchange transaction are accounted for in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers).

Presentation

Interest relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

Losses and gains relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

A financial asset and a financial liability are only offset and the net amount presented in the statement of financial position when the entity currently has a legally enforceable right to set off the recognised amounts and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

In accounting for a transfer of a financial asset that does not qualify for derecognition, the entity does not offset the transferred asset and the associated liability.

Ezinqoleni Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.7 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

Finance leases – lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Operating leases – lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset. This liability is not discounted.

1.8 Impairment of assets

The municipality assesses at each reporting period date whether there is any indication that an asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount of the asset.

Irrespective of whether there is any indication of impairment, the municipality also:

- tests goodwill, with an indefinite useful life or intangible assets not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed during the annual period and at the same time every period.

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the recoverable amount of the cash-generating unit to which the asset belongs is determined.

If an impairment loss subsequently reverses, the carrying amount of the asset (or group of related assets) is increased to the revised estimate of its recoverable amount (selling price less costs to complete and sell, in the case of inventories), but not in excess of the amount that would have been determined had no impairment loss been recognised for the asset (or group of assets) in prior years. A reversal of impairment is recognised immediately in profit or loss.

1.9 Employee benefits

Short-term employee benefits

Employee benefits are all forms of consideration given by an entity in exchange for service rendered by employees.

Other long-term employee benefits are employee benefits (other than post-employment benefits and termination benefits) that are not due to be settled within twelve months after the end of the period in which the employees render the related service.

Vested employee benefits are employee benefits that are not conditional on future employment.

Composite social security programmes are established by legislation and operate as multi-employer plans to provide postemployment benefits as well as to provide benefits that are not consideration in exchange for service rendered by employees.

A constructive obligation is an obligation that derives from an entity's actions where by an established pattern of past practice, published policies or a sufficiently specific current statement, the entity has indicated to other parties that it will accept certain responsibilities and as a result, the entity has created a valid expectation on the part of those other parties that it will discharge those responsibilities.

Accounting Policies

1.9 Employee benefits (continued)

Post employment benefits

Payments to defined contribution retirement benefit plans are charged as an expense as they fall due.

Post-employment benefits: Defined contribution plans

Defined contribution plans are post-employment benefit plans under which an entity pays fixed contributions into a separate entity (a fund) and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods.

When an employee has rendered service to the entity during a reporting period, the entity recognise the contribution payable to a defined contribution plan in exchange for that service:

- as a liability (accrued expense), after deducting any contribution already paid. If the contribution already paid exceeds the contribution due for service before the reporting date, an entity recognise that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the contribution in the cost of an asset.

Where contributions to a defined contribution plan do not fall due wholly within twelve months after the end of the reporting period in which the employees render the related service, they are discounted. The rate used to discount reflects the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the obligation

Post-employment benefits: Defined benefit plans

Defined benefit plans are post-employment benefit plans other than defined contribution plans.

Actuarial gains and losses comprise experience adjustments (the effects of differences between the previous actuarial assumptions and what has actually occurred) and the effects of changes in actuarial assumptions. In measuring its defined benefit liability the entity recognise actuarial gains and losses in surplus or deficit in the reporting period in which they occur.

Assets held by a long-term employee benefit fund are assets (other than non-transferable financial instruments issued by the reporting entity) that are held by an entity (a fund) that is legally separate from the reporting entity and exists solely to pay or fund employee benefits and are available to be used only to pay or fund employee benefits, are not available to the reporting entity's own creditors (even in liquidation), and cannot be returned to the reporting entity, unless either:

- the remaining assets of the fund are sufficient to meet all the related employee benefit obligations of the plan or the reporting entity; or
- the assets are returned to the reporting entity to reimburse it for employee benefits already paid.

Current service cost is the increase in the present value of the defined benefit obligation resulting from employee service in the current period.

Interest cost is the increase during a period in the present value of a defined benefit obligation which arises because the benefits are one period closer to settlement.

Past service cost is the change in the present value of the defined benefit obligation for employee service in prior periods, resulting in the current period from the introduction of, or changes to, post-employment benefits or other long-term employee benefits. Past service cost may be either positive (when benefits are introduced or changed so that the present value of the defined benefit obligation increases) or negative (when existing benefits are changed so that the present value of the defined benefit obligation decreases). In measuring its defined benefit liability the entity recognise past service cost as an expense in the reporting period in which the plan is amended.

Plan assets comprise assets held by a long-term employee benefit fund and qualifying insurance policies.

The present value of a defined benefit obligation is the present value, without deducting any plan assets, of expected future payments required to settle the obligation resulting from employee service in the current and prior periods.

The return on plan assets is interest, dividends or similar distributions and other revenue derived from the plan assets, together with realised and unrealised gains or losses on the plan assets, less any costs of administering the plan (other than those included in the actuarial assumptions used to measure the defined benefit obligation) and less any tax payable by the plan itself.

Ezingoleni Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.9 Employee benefits (continued)

The entity account not only for its legal obligation under the formal terms of a defined benefit plan, but also for any constructive obligation that arises from the entity's informal practices. Informal practices give rise to a constructive obligation where the entity has no realistic alternative but to pay employee benefits. An example of a constructive obligation is where a change in the entity's informal practices would cause unacceptable damage to its relationship with employees.

The amount recognised as a defined benefit liability is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly;
- plus any liability that may arise as a result of a minimum funding requirement

The amount determined as a defined benefit liability may be negative (an asset). The entity measure the resulting asset at the lower of:

- the amount determined above; and
- the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan. The present value of these economic benefits is determined using a discount rate which reflects the time value of money.

Any adjustments arising from the limit above is recognised in surplus or deficit.

The entity determine the present value of defined benefit obligations and the fair value of any plan assets with sufficient regularity such that the amounts recognised in the financial statements do not differ materially from the amounts that would be determined at the reporting date.

The entity recognises the net total of the following amounts in surplus or deficit, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

- current service cost;
- interest cost;
- the expected return on any plan assets and on any reimbursement rights;
- actuarial gains and losses;
- past service cost;
- the effect of any curtailments or settlements; and
- the effect of applying the limit on a defined benefit asset (negative defined benefit liability).

The entity uses the Projected Unit Credit Method to determine the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost. The Projected Unit Credit Method (sometimes known as the accrued benefit method pro-rated on service or as the benefit/years of service method) sees each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation.

In determining the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost, an entity shall attribute benefit to periods of service under the plan's benefit formula. However, if an employee's service in later years will lead to a materially higher level of benefit than in earlier years, an entity shall attribute benefit on a straight-line basis from:

- the date when service by the employee first leads to benefits under the plan (whether or not the benefits are conditional on further service); until
- the date when further service by the employee will lead to no material amount of further benefits under the plan, other than from further salary increases.

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan. The results of the valuation are updated for any material transactions and other material changes in circumstances (including changes in market prices and interest rates) up to the reporting date.

The entity recognises gains or losses on the curtailment or settlement of a defined benefit plan when the curtailment or settlement occurs. The gain or loss on a curtailment or settlement comprises:

- any resulting change in the present value of the defined benefit obligation; and
- any resulting change in the fair value of the plan assets.

Before determining the effect of a curtailment or settlement, the entity re-measure the obligation (and the related plan assets, if any) using current actuarial assumptions (including current market interest rates and other current market prices).

Ezingoleni Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.9 Employee benefits (continued)

When it is virtually certain that another party will reimburse some or all of the expenditure required to settle a defined benefit obligation, the right to reimbursement is recognised as a separate asset. The asset is measured at fair value. In all other respects, the asset is treated in the same way as plan assets. In surplus or deficit, the expense relating to a defined benefit plan is [OR is not] presented as the net of the amount recognised for a reimbursement.

The entity offsets an asset relating to one plan against a liability relating to another plan when the entity has a legally enforceable right to use a surplus in one plan to settle obligations under the other plan and intends either to settle the obligations on a net basis, or to realise the surplus in one plan and settle its obligation under the other plan simultaneously.

1.10 Provisions

Provisions are recognised when:

- the municipality has an obligation at the reporting period date as a result of a past event;
- it is probable that the municipality will be required to transfer economic benefits in settlement; and
- the amount of the obligation can be estimated reliably.

Contingencies are disclosed in notes 22 and 23. .

1.11 Government grants

Government grants are recognised when there is reasonable assurance that:

- the municipality will comply with the conditions attaching to them; and
- the grants will be received.

Government grants are recognised as income over the periods necessary to match them with the related costs that they are intended to compensate.

A government grant that becomes receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the entity with no future related costs is recognised as income of the period in which it becomes receivable.

1.12 Conditional grants and receipts

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met a liability is recognised.

Ezinqoleni Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.13 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- the municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Service revenue is recognised by reference to the stage of completion of the transaction at the reporting date. Stage of completion is determined by services performed to date as a percentage of total services to be performed.

Ezingoleni Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.14 Revenue from non-exchange transactions

Revenue comprises gross inflows of economic benefits or service potential received and receivable by a municipality, which represents an increase in net assets, other than increases relating to contributions from owners.

Conditions on transferred assets are stipulations that specify that the future economic benefits or service potential embodied in the asset is required to be consumed by the recipient as specified or future economic benefits or service potential must be returned to the transferor.

Control of an asset arises when the municipality can use or otherwise benefit from the asset in pursuit of its objectives and can exclude or otherwise regulate the access of others to that benefit.

Exchange transactions are transactions in which one entity receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of cash, goods, services, or use of assets) to another entity in exchange.

Expenses paid through the tax system are amounts that are available to beneficiaries regardless of whether or not they pay taxes.

Fines are economic benefits or service potential received or receivable by entities, as determined by a court or other law enforcement body, as a consequence of the breach of laws or regulations.

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, an entity either receives value from another entity without directly giving approximately equal value in exchange, or gives value to another entity without directly receiving approximately equal value in exchange.

Restrictions on transferred assets are stipulations that limit or direct the purposes for which a transferred asset may be used, but do not specify that future economic benefits or service potential is required to be returned to the transferor if not deployed as specified.

Stipulations on transferred assets are terms in laws or regulation, or a binding arrangement, imposed upon the use of a transferred asset by entities external to the reporting entity.

Transfers are inflows of future economic benefits or service potential from non-exchange transactions, other than taxes.

Recognition

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

As the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it reduces the carrying amount of the liability recognised and recognises an amount of revenue equal to that reduction.

Measurement

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets recognised by the municipality.

When, as a result of a non-exchange transaction, the municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability.

Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

1.15 Value Added Tax

The municipality accounts for value added tax on the payments basis in accordance with section 15(2)(a) of the Value Added Tax Act (Act No. 89 of 1991).

Ezingoleni Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.16 Investment income

Investment income is recognised on a time-proportion basis using the effective interest method.

1.17 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year's figures.

1.18 Commitments

Commitments for which disclosure is necessary to achieve a fair presentation should be disclosed in a note to the financial statements,

Items are classified as commitments when an entity has committed itself to future transactions that will normally result in the outflow of cash.

Disclosures are required in respect of unrecognised contractual commitments.

1.19 Events after reporting dates

Events after the reporting date are classified as adjusting events are accounted for in the financial statements and events after the reporting dates that are classified as non-adjusting events are disclosed in the notes to the financial statements.

1.20 Budget information

Economic Entity are typically subject to budgetary limits in the form of appropriations or budget authorisations (or equivalent), which is given effect through authorising legislation, appropriation or similar.

General purpose financial reporting by economic entity shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The approved budget is prepared on a cash basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 1 July 2014 to 30 June 2015.

The budget for the economic entity includes all the entities approved budgets under its control.

The financial statements and the budget are not on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

Comparative information is not required.

1.21 Related parties

Individuals as well as their close family members, and/or entities are related parties if one party has the ability, directly or indirectly, to control or jointly control the other party or exercise significant influence over the other party in making financial and/or operating decisions.

Ezinqoleni Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.22 Irregular expenditure

Irregular expenditure as defined in chapter 1 of the Municipal Finance Management Act (Act No 56 of 2003) in relation to a municipality or municipal entity -

- Expenditure incurred by a municipality or municipal entity in contravention of, or that is not in accordance with, the requirement of this Act, and which has not been condoned in terms of section 170
- Expenditure incurred in contravention of, or that is not in accordance with, a requirement of the Municipal Systems Act (Act No.32 of 2000)
- Expenditure incurred in contravention of, or that is not in accordance with, a requirement of the Public Office Bearers Act (Act No. 20 of 1998)
- Expenditure incurred in contravention of, or that is not in accordance with, a requirement of the Supply Chain Management Policy or any Municipal By-Laws giving effect to such policy, and which has not been condoned in terms of such policy or By-law, but excludes expenditure which falls within the definition of unauthorised expenditure

Irregular expenditure that was incurred and identified during the current financial year and which was condoned before year end and/or before finalisation of the financial statements must also be recorded appropriately in the irregular expenditure register. In such an instance, no further action is also required with the exception of updating the note to the financial statements.

Irregular expenditure that was incurred and identified during the current financial year and for which condonement is being awaited at year end must be recorded in the irregular expenditure register. No further action is required with the exception of updating the note to the financial statements.

Where irregular expenditure was incurred in the previous financial year and is only condoned in the following financial year, the register and the disclosure note to the financial statements must be updated with the amount condoned.

Irregular expenditure that was incurred and identified during the current financial year and which was not condoned by the National Treasury or the relevant authority must be recorded appropriately in the irregular expenditure register. If liability for the irregular expenditure can be attributed to a person, a debt account must be created if such a person is liable in law. Immediate steps must thereafter be taken to recover the amount from the person concerned. If recovery is not possible, the accounting officer or accounting authority may write off the amount as debt impairment and disclose such in the relevant note to the financial statements. The irregular expenditure register must also be updated accordingly. If the irregular expenditure has not been condoned and no person is liable in law, the expenditure related thereto must remain against the relevant programme/expenditure item, be disclosed as such in the note to the financial statements and updated accordingly in the irregular expenditure register.

Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.23 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.24 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.25 Contingent assets and contingent liabilities

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in the notes to the financial statements.

Annual Financial Statements for the year ended 30 June 2015

Notes to the Annual Financial Statements

Figures in Rand	2015	2014
-----------------	------	------

2. Leasehold property, plant and equipment (continued)

No asset or any portion of any assets was provided to any person or institution as security.

Community halls to the value of R11.9 million have been included in the buildings disclosure above, the lease agreement for the use of the land on which the buildings are housed is pending final approval from the Ingonyama Trust Board.

3. Intangible assets

	2015			2014		
	Cost / Valuation	Accumulated amortisation	Carrying value	Cost / Valuation	Accumulated amortisation	Carrying value
Computer software	855 157	(530 186)	324 971	587 191	(455 671)	131 520

Reconciliation of intangible assets - 2015

	Opening balance	Additions	Amortisation	Total
Computer software	131 520	267 966	(74 515)	324 971

Reconciliation of intangible assets - 2014

	Opening balance	Additions	Amortisation	Total
Computer software	120 275	63 175	(51 930)	131 520

See Annexure B for more information.

During the period under review the remaining useful lives of Intangible assets were reviewed and it was found that these assets would fully depreciate within the next 11 to 23 months after year end. It was determined that these assets will still be utilized for at least the next 24 months, as a result the remaining useful lives were adjusted with between 1 and 13 months. This revision has resulted in a reduction in the current year amortization of R30 411 and will reduce the amortization for the following two financial years with R60 823

4. Receivables from non-exchange transactions

Rates	3 408 050	2 090 041

Annual Financial Statements for the year ended 30 June 2015

Notes to the Annual Financial Statements

Figures in Rand	2015	2014
-----------------	------	------

8. Employee benefit obligation

Long service awards

Non-current liabilities	571 000	457 000
-------------------------	---------	---------

A long-service award is granted to municipal employees after the completion of fixed periods of continuous service with the Municipality. The said award comprises of a certain number of additional vacation leave days. The provision represents an estimation of the awards to which employees in the service of the Municipality at 30 June 2015 may become entitled to in future, based on an actuarial valuation performed at that date.

The most recent actuarial valuations of plan assets and the present value of the unfunded defined benefit obligation were carried out as at 30 June 2015 by One Pangaea Financial. The present value of the defined benefit obligation, and the related current service cost were measured using the Projected Unit Credit Method. No other long service benefits are provided by the Municipality.

The future cost for ensuing year is estimated to be R80 000 and the interest cost for the next year is estimated to be R47 000 (2014: R70 000 and R31 000 respectively).

The principal actuarial assumptions used were as follows:

Discount rate per annum	8.51 %	8.59 %
Inflation rate	6.25 %	6.36 %
Salary increase rate	7.25 %	7.36 %
Normal retirement age	63	63
Proportion continuing membership at retirement	95 %	95 %
Proportion of retiring members who are married	95 %	95 %
Mortality during employment	SA 85-90 light	SA 85-90 light
Percentage of in-service members withdrawing before retirement:		
Age 20 - 24	12.0 %	12.0 %
Age 25 - 29	6.6 %	6.6 %
Age 30 - 34	5.1 %	5.1 %
Age 35 - 39	3.6 %	3.6 %
Age 40 - 44	2.6 %	2.6 %
Age 45 - 49	1.8 %	1.8 %
Age 50 - 54	1.1 %	1.1 %
Age 55 - 59	0.0 %	0.0 %
Age 60 -	0.0 %	0.0 %

Present value of the obligation	571 000	457 000
--	----------------	----------------

Movement in the defined benefit obligation is as follows:

Balance at beginning of the year	457 000	434 000
Current service cost	72 000	70 000
Interest cost	39 000	31 000
Actuarial (Gain) / Loss	14 000	(63 000)
Benefits payments by Municipality	(11 000)	(15 000)
	571 000	457 000

The amounts recognised in the Statement of Financial Performance were as follows:

Current service cost	72 000	70 000
Interest cost	39 000	31 000
Expected return on assets	-	-
Actuarial (Gain) / Loss	14 000	(63 000)

Post retirement pension plan

The municipality's personnel are members of one of the Natal Joint Municipal Pension retirement funds, namely the Superannuation, Retirement and Provident Funds. As the aforementioned funds are multi-employer funds, the allocation of any surplus/deficit to individual municipalities cannot be determined. Furthermore disclosure of further details such as actuarial assumptions, cannot be attributed to any specific municipality and is of no relevance to users of the municipality's financial statements.

An independent valuer carries out a statutory valuation of the NJMPF on a triennial basis and an interim valuation on an annual basis. The findings are extracts from the interim actuarial valuation at 31 March 2013 released 13 November 2013.

Superannuation Fund

The last valuation carried out on the Superannuation Fund as at 31 March 2013 reflected:

- The memorandum account in respect of pensioners was fully funded.
- The results show that the contributions from members and the local authorities at the valuation date are .83% less than the required contribution rate for future service.
- The valuation reveals that the total fund is 97.9 funded as the valuation date at the overall level.

Retirement Fund

The interim valuation carried out on the Retirement Fund as at 31 March 2013 reflected:

- The fund is 93.1% funded as at the valuation date at the overall level
- The latest statutory valuation of the Retirement Fund as at 31 March 2013 revealed that the fund was not in a sound financial position but with the surcharge being paid is expected to restore the Fund to a sound financial condition within the period permitted by the FSB.

Provident Fund

The latest statutory valuation of the Provident Fund (defined contribution) as at 31 March 2013 revealed that the fund was in a sound financial position.

9. Post Employment Medical Liability

Post retirement medical subsidy

employee benefits		
Non-current liabilities	1 586 000	1 040 000

The principal actuarial assumptions used were as follows:

Discount rate per annum (D)	10.27 %	10.27 %
Consumer price inflation (C)	7.45 %	7.45 %
Health care cost inflation (H)	8.95 %	8.95 %
Salary inflation (S)	6.90 %	6.90 %
Net discount rate $((1+D)/(1+H)-1)$	1.21 %	1.21 %
Normal retirement age	63	63
Fully accrued age	63	63
Early retirement age	55	55

Interest cost	107 000	75 000
Expected return on assets	-	-
Actuarial (Gain) / Loss	272 000	(241 000)
	546 000	9 000

Disclosure in terms of Paragraph 120A(P)&(Q) of IAS19 and GRAP 25

Par. 120A(p) of IAS 19 requires the disclosure of the following amounts for the current annual period and previous four annual periods:

- The present value of the defined benefit obligation, the fair value of the plan assets and the surplus or deficit in the plan; and
- The experience adjustments arising on the plan liabilities and plan assets.

Ezingoleni Municipality

Annual Financial Statements for the year ended 30 June 2015

Notes to the Annual Financial Statements

Figures in Rand	2015	2014
Par. 120A(p)	30 June 2014	30 June 2015
Defined benefit obligation	1 040 000	1 586 000
Experience adjustments on plan liabilities	3 000	88 000
		1 930 000

Par. 120A(q) of IAS 19 requires the disclosure of the employer's best estimate, as soon as it can reasonably be determined, of contributions expected to be paid during the annual period beginning after the reporting period.

The figure in the table below should be based on the pensioner contributions as at 30 June 2015, as provided by the employer, for the next financial year, increased with expected healthcare cost inflation from 1 January 2015. Since Ezingoleni Municipality is yet to subsidise pensioners, the benefits/contributions expected over the following year are RNil.

Par. 120A(q)	30 June 2016
Employer contributions to be paid during the next financial year	-

Sensitivity Analysis

Health care cost inflation

The valuation basis assumes that the health care cost inflation rate (which manifests itself as the annual increase to the total contribution subsidised by the employer) will be 0.71% less than the corresponding discount rate, in the long term. The effect of a one percent increase and decrease in the health care cost inflation rate is as follows:

Health care cost inflation	1% decrease	Valuation basis	1% increase
Employer's accrued liability	1 230 000	1 586 000	2 069 000
Employer's service cost	156 000	209 000	284 000
Employer's interest cost	105 000	135 000	176 000

The table below shows the impact of a change in the mortality assumption from PA(90) with a two year adjustment to PA(90) with a three year adjustment.

Mortality	Valuation basis PA (90) -2	PA (90) -3*
Employer's accrued liability	1 586 000	1 641 000
Employer's service cost	209 000	216 000
Employer's interest cost	135 000	140 000

*PA(90)-3 (PA(90) with a three-year age adjustment) means that, to each beneficiary we assigned a mortality rate of an individual three years younger than that beneficiary, ie lighter mortality implying that the individual lives longer than expected in the valuation basis.

Therefore, the above change in the mortality assumption would result in a 3.5% increase in the accrued liability.

10. Payables from exchange transactions

Trade payables	127 618	230 692
Retentions	1 515 808	1 852 303
Accrued leave pay	389 642	414 066
Accrual for staff bonus	471 538	375 855
	2 504 606	2 872 916

Annual Financial Statements for the year ended 30 June 2015

Notes to the Annual Financial Statements

Figures in Rand	2015	2014
-----------------	------	------

30. Risk management

Financial risk management

The Accounting Officer has overall responsibility for the establishment and oversight of the municipality's risk management framework. The municipality's risk management policies are established to identify and analyse the risks faced by the municipality, to set appropriate risk limits and controls and to monitor risks and adherence to limits.

Due to the largely non-trading nature of activities and the way in which they are financed, municipalities are not exposed to the degree of financial risk faced by business entities. Financial Instruments play a much more limited role in creating or changing risks that would be typical of listed companies to which the IASs mainly apply. Generally, Financial Assets and Liabilities are generated by day-to-day operational activities and are not held to manage the risks facing the municipality in undertaking its activities.

The Chief Financial Officer monitors and manages the financial risks relating to the operations through internal policies and procedures. These risks include interest rate risk, credit risk and liquidity. Compliance with policies and procedures is reviewed by the internal auditors on a continuous basis, and annually by external auditors. The municipality does not enter into or trade financial instruments for speculative purposes.

Internal audit, responsible for initiating a control framework and monitoring and responding to potential risk, reports quarterly to the municipality's audit committee, an independent body that monitors the effectiveness of the internal audit function.

Liquidity risk

Liquidity Risk is the risk that the municipality will encounter difficulty in meeting the obligations associated with its Financial Liabilities that are settled by delivering cash or another financial asset. The municipality's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the municipality's reputation.

Liquidity Risk is managed by ensuring that all assets are reinvested at maturity at competitive interest rates in relation to cash flow requirements. Liabilities are managed by ensuring that all contractual payments are met on a timeous basis and, if required, additional new arrangements are established at competitive rates to ensure that cash flow requirements are met.

Credit risk

Credit Risk is the risk of financial loss to the municipality if a customer or counterparty to a Financial Instrument fails to meet its contractual obligations and arises principally from the municipality's receivables from customers and investment securities

Credit Risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the municipality. The municipality has a sound credit control and debt collection policy and obtains collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults. The municipality uses other publicly available financial information and its own trading records to assess its major customers. The municipality's exposure of its counterparties are monitored regularly.

Potential concentrations of credit rate risk consist mainly of fixed deposit investments, long-term debtors, consumer debtors, other debtors, shortterm investment deposits and bank and cash balances

Trade and Other Receivables are amounts owed by consumers and are presented net of impairment losses. The municipality has a credit risk policy in place and the exposure to credit risk is monitored on an ongoing basis. The municipality is compelled in terms of its constitutional mandate to provide all its residents with basic minimum services without recourse to an assessment of creditworthiness. Subsequently, the municipality has no control over the approval of new customers who acquire properties in the designated municipal area and consequently incur debt for rates, water and sanitation services rendered to them.

Consumer Debtors comprise of a large number of ratepayers, dispersed across different industries and geographical areas. Ongoing credit evaluations are performed on the financial condition of these debtors. Consumer debtors are presented net of a provision for impairment.

Trade receivables consist of a large number of customers, spread across diverse industries in the geographical area of the municipality.

Periodic credit evaluation is performed on the financial condition of accounts receivable and, where appropriate, credit guarantee is increased accordingly.

Ezingoleni Municipality

Annual Financial Statements for the year ended 30 June 2015

Notes to the Annual Financial Statements

Figures in Rand	2015	2014
-----------------	------	------

Consumer Debtors comprise of a large number of ratepayers, dispersed across different industries and geographical areas. Ongoing credit evaluations are performed on the financial condition of these debtors. Consumer debtors are presented net of a provision for impairment. In the case of debtors whose accounts become in arrears, it is endeavoured to collect such accounts by "levying of penalty charges", "demand for payment", "restriction of services" and, as a last resort, "handed over for collection", whichever procedure is applicable in terms of Council's Credit Control and Debt Collection Policy.

The municipality limits this risk exposure in the following ways, in addition to its normal credit control and debt management procedures:

- The application of section 118(3) of the Municipal Systems Act (MSA), which permits the municipality to refuse connection of services whilst any amount remains outstanding from a previous debtor on the same property;
- A new owner is advised, prior to the issue of a rates clearance certificate, that any debt remaining from the previous owner will be transferred to the new owner, if the previous owner does not settle the outstanding amount;
- Encouraging residents to install water management devices that control water flow to households, and/or prepaid meters.
- The requirement of a deposit for new service connections, serving as guarantee
- The consolidation of rates and service accounts, enabling the disconnecting services for the non-payment of any of the individual debts, in terms of section 102 of the MSA;

There were no material changes in the exposure to credit risk and its objectives, policies and processes for managing and measuring the risk during the year under review. The municipality's maximum exposure to credit risk is represented by the carrying value of each financial asset in the Statement of Financial Position, without taking into account the value of any collateral obtained. The municipality has no significant concentration of credit risk, with exposure spread over a large number of consumers, and is not concentrated in any particular sector or geographical area.

The municipality establishes an allowance for impairment that represents its estimate of anticipated losses in respect of trade and other receivables.

The maximum credit and interest risk exposure in respect of the relevant financial instruments is as follows:

Financial Instrument		
Cash and cash equivalents	40 974 123	36 624 176
Consumer debtors	2 715 911	1 397 902
Other debtors	172 982	169 159
	43 863 016	38 191 237

Market risk

Interest rate risk

Interest Rate Risk is defined as the risk that the fair value or future cashflows associated with a financial instrument will fluctuate in amount as a result of market interest changes.

Financial Assets and Liabilities that are sensitive to interest rate risk are cash and cash equivalents, investments, and loan payables. The municipality is not exposed to interest rate risk on these financial instruments as the rates applicable are fixed interest rates.

Potential concentrations of interest rate risk consist mainly of fixed deposit investments, long-term debtors, consumer debtors, other debtors, short-term investment deposits and bank and cash balances.

The municipality limits its counterparty exposures from its money market investment operations by only dealing with well-established financial institutions of high credit standing. The credit exposure to any single counterparty is managed by setting percentage exposure limits, which are included in the municipality's Investment Policy. These limits are reviewed periodically by the Chief Financial Officer and authorised by the Council.

Consumer Debtors comprise of a large number of ratepayers, dispersed across different industries and geographical areas. Periodic credit evaluations are performed on the financial condition of these debtors. Consumer debtors are presented net of a provision for impairment.

In the case of debtors whose accounts become in arrears, it is endeavoured to collect such accounts by "levying of penalty charges", "demand for payment", "restriction of services" and, as a last resort, "handed over for collection", whichever procedure is applicable in terms of Council's Credit Control and Debt Collection Policy.

Annual Financial Statements for the year ended 30 June 2015

Notes to the Annual Financial Statements

Figures in Rand	2015	2014
-----------------	------	------

Long-term Receivables and Other Debtors are individually evaluated annually at Balance Sheet date for impairment or discounting. A report on the various categories of debtors is drafted to substantiate such evaluation and subsequent impairment / discounting, where applicable

31. Fruitless and wasteful expenditure

Fruitless and wasteful expenditure of R61 806 was incurred during the year under review (2014: Nil).

Reconciliation of Fruitless and wasteful expenditure

Opening balance	-	-
Interest paid on late submissions to Sars	61 806	-
Amounts to be written off after investigation by council	-	-
Fruitless and wasteful expenditure awaiting Investigation by Council	61 806	-

32. Events after the reporting period

It has been proposed that Ezingoleni Municipality will merge with the Hibiscus Coast Municipality to form a new municipality in the next financial year.
